

Thank you for submitting your article to the American Journal of Orthodontics & Dentofacial Orthopedics. The reviewers liked it very much, and I am pleased that we will be able to publish it. We received one other Centennial article that we were not able to publish in 2015, so we are grouping the two articles in the June 2016 issue of the Journal. The production department will send you an email when the proof is ready for your approval.

Thank you for submitting your work to this journal. I look forward to seeing it in print.

With kind regards,

Rolf Behrents  
Editor-in-Chief

Comments from the Reviewers:

Reviewer #2: This is a well structured review of both the historical background and the contemporary application of imaging and management systems in Orthodontics. It is informative and interesting for the reader and for and the current generation of Orthodontists provides a perspective of a fast moving application of technological advancements to Orthodontics. It is hard to imagine a future without digital imaging systems - the manual tracings of cephalograms on acetate paper, which lasted many years, was abandoned abruptly by a new generation so engaged and embraced in the wonders of technology that the laborious past is quickly forgotten with efficiency and speed being the ultimate ambition in all aspects of today's practicing orthodontist.

Reviewer #3: This very well done article is quite fascinating. Readers will have a great time with it.
