Dear Dolphin Family Member:

Maintaining the confidentiality of electronic records is a growing concern among providers, patients—and the government. That's why **Dolphin Premium** has designed security features to help you comply with federal privacy laws, including the U.S. Health Insurance Portability and Accountability Act (HIPAA) of 1996.

Every member of your staff can stay legal by utilizing these features:

- **Login:** Set up Dolphin Premium to require that your staff login with a user name and password. The software can accommodate more than 90 Dolphin Employee Rights configurations that grant and control access to specific areas of both the Management and Imaging programs.
- **Finger Print Scan Login:** This biometric security feature allows you to designate access to sensitive data and secure employee clock in/out.
- **Event Logging:** Dolphin Premium will write a report of all account activity. The system will record events such as logging into Dolphin, accessing patient records, capturing photos, performing treatment simulations, etc.
- **Protected Database:** Dolphin stores all data in a password-protected format inside of Microsoft SQL Server commercial-grade database, and all images are stored in a proprietary format, making even intentional, malicious access rather difficult.
- **Patient Cloaking:** This function hides your list of patient names while you present or share any patients' records.

Patient privacy is everybody's business. Protect yours by using these Dolphin Premium security features.

*The security features require Dolphin Imaging Premium software with a secure operating system: Windows XP Professional Edition or Windows Server 2003.

NOTE: The security features will NOT work with Windows 98 or ME.

February 1, 2024

Dear Dolphin Management Customer,

This notice is to inform you that future updates of Dolphin Management, including the ongoing release of version 11.2, will no longer support integrations that utilize our retired Software Development Kit (SDK). As of version 11.0, all integrations must transition to our new Application Programming Interface (API). This currently includes Demandforce, Lighthouse 360, PracticeGenius, Sesame, and Solutionreach.

We consistently enhance the Dolphin software to provide a better experience for your patients and your practice, and our third-party integrations are a large part of this. Integral to these efforts is fulfillment of our regulatory and compliance obligations, which involves continuous improvements to both security and data access controls. As such, we keep our vendor partners up to date with all of the latest compliance requirements for integrating with Dolphin.

If you want to continue using any of these integrations, please reach out to the 3rd party vendor. We apologize for any inconvenience that this may cause, but we are confident that any of our many other integrations will fulfill your practice's needs. Please visit www.dolphinimaging.com/integration for a complete list, or reach out to your Dolphin sales rep at sales@dolphinimaging.com.

We appreciate your understanding.

Dolphin Management Development Team

Now available:
**An integration between the
3M™ Oral Care Portal and
Dolphin Management.**

Dolphin Management integrates with 3M Oral Care Portal

Chatsworth, CA, October, 2023 — The Dolphin Management Development Team announces its newest integration with the 3M™ Oral Care Portal, offering web-based ability to analyze, design, and track digital orthodontic and restorative treatment. Accessing the cloud-based 3M Oral Care Portal through Dolphin Management provides an intuitive digital workflow that offers tools for aligner, digital bonding, restorative, retention, and combination treatment.

"We are excited to offer this integration with Dolphin Management. Optimizing the digital workflow is key to managing a successful practice. And we remain steadfast in our goal to deliver enhancements which maximize workflow efficiency," says Thomas Worm, Global Platform Director, 3M Oral Care.

Dolphin Management is a full-featured orthodontic practice management system that enables practices of any size to efficiently manage and organize workflow. The program features consistent upgrades and an ongoing list of third-party integrations and collaborations. 3M Oral Care Portal is the seamless platform for 3M™ Clarity™ Aligners, 3M™ Digital Bonding, 3M™ Clarity™ Retainers, and 3M™ Filtek™ Matrix. Oral Care Portal offers the web-based ability to analyze, design, and track digital orthodontic, restorative, and combination treatment.
